

## CRC Cards:

Class: AMazeActivity.java

Responsibilities: This is the initial screen that the user will see. It will allow the user to select a skill level and a method of maze generation and then proceed to the generation screen.

Collaborators: GeneratingActivity.java

Class: GeneratingActivity.java

Responsibilities: This screen will generate the maze and show that progress. Once that has completed, the user can select which driver and which options they want. The user can then start playing the maze.

Collaborators: AMazeActivity.java, PlayActivity.java

Class: PlayActivity.java

Responsibilities: Allows the user to play the maze, change the options. A battery level is kept. When the maze is solved proceeds to the final screen.

Collaborators: AMazeActivity.java, FinishActivity.java

Class: FinishActivity.java

Responsibilities: Shows the user whether or not they won. Gives the user instructions on what to do next. Allows user to save the maze for later.
